

50 YEAR GUARANTEE

Off Site Solutions are pleased to offer a 50 year guarantee that the carcass of our GRP composite pod will not structurally fail. This guarantee excludes wear and tear and is only valid if the terms of Off Site Solutions' Operations and Maintenance Manuals are adhered to. In addition the guarantee must be registered with Off Site Solutions at the address below.

BENEFITS OF THE OFF SITE SOLUTIONS GRP COMPOSITE SYSTEM

As well as being hygienic and offering extremely low maintenance costs, Off Site Solutions' GRP composite pod is lightweight, robust and offers fully waterproof floors. In addition, other benefits include:

WRAS approved and marine grade resins and gelcoat

Tested under extreme conditions in the marine industry, Off Site Solutions' resins and gelcoats will retain their integrity and high level of finish.

Test Report M104899A, 26/56124 Cert No. MAT/88/4, MATS/88/3

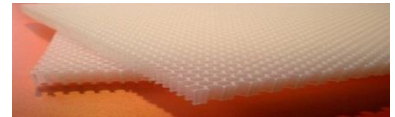

Vertical pod walls & door openings

Walls and door openings are plumb which means that the integration of the pod on site becomes much easier, allowing the use of standard door sets without further work on site.

Honeycomb Polypropylene Core Technology

Off Site Solutions honeycomb core structure provides an immensely strong structure that is not susceptible to delamination.

Refurb flat pack options

This option is ideal for both the refurbishment of existing buildings as well as in the conversion of office space to residential or student, where access is restricted but time is of the essence.

Tile effect finishes

A tiled effect finish to the walls, which is so realistic both visually and to the touch that many clients have taken some convincing that it is not in fact ceramic tiling. The finish offers all the aesthetic benefits of tiling but banishes the hard work and maintenance required in keeping tiles and grout looking pristine.

Integral moulded features

Moulded features such as soap dishes, thresholds and recesses reduce the requirement for additional fixings, keeping costs lower and cleaning easier.
