FACTORY BUILT BATHROOMS

Healthcare

Offsite Solutions is the **premier** bathroom pod manufacturer in the UK supplying over 8,000 pod units every year to **leading** main-contractors and developers.

We offer a comprehensive range of high-quality healthcare bathroom pods and have unparalleled experience in design, manufacture and supply for the Healthcare sector.

Bathroom pod designs can either be selected from the wide variety of popular footprints in our design library or new bespoke designs can be developed to meet individual project requirements.

Offsite Solutions combine innovative design with manufacturing expertise and construction knowledge to deliver a solution that exceeds the demanding standards of today's construction industry.

Choice of popular existing footprints or **bespoke** designs.

GRP Composite Healthcare Bathroom Pods

Our GRP Composite units have been designed specifically for healthcare environments where hygiene, durability and longevity are of paramount importance. Not only are they extremely low maintenance they are also easy clean, lightweight, robust and have fully waterproof bonded floors. **Further benefits include:**

Marine Grade and WRAS approved resins and gelcoat
Tested under extreme conditions in the marine industry the high-quality resins and gelcoats used are colourfast and will retain their integrity and finish over time.

Vertical pod walls and door openings
Walls and door openings are plumb meaning that integration of the pod is uncomplicated, allowing the use of standard door sets, without further work on-site.

Honeycomb Polypropylene Core Technology
Offsite Solutions honeycomb core structure provides an extremely strong composite sandwich which is fully waterproof and not susceptible to delamination.

Refurbishment flat-pack options
Our panelised pods are ideal for the refurbishment or conversion of existing buildings where access may be restricted but a hygienic and robust GRP composite finish is still required.

Tiled effect finish
Our market leading GRP 'tiled effect' finish can be used which offers all the aesthetic benefits of ceramic or porcelain tiles but without any of the potential concerns.

Integral moulded features
Thresholds, recesses and toiletry shelves can be moulded into the wall and floor panels minimising the need for secondary fittings, reducing costs and allowing for easier cleaning.

Ergonomic designs
Our engineers have developed a specification to meet the durability requirements of a frequent-use wet-room whilst providing a comfortable, ergonomic and familiar environment for patients.

**50 YEAR
GUARANTEE**

Certified and Tested

Every Offsite Solutions bathroom pod is given a unique identification number for traceability and is checked at each stage of production. Each pod is thoroughly tested and certified and is delivered with its own specific set of quality documents.

Technical Details

Bathroom pods can be manufactured with various different wall and floor thicknesses, however our walls are nominally 35mm thick and floor 40mm thick.

Offsite Solutions is pleased to offer a 50 year guarantee on all GRP composite pods (Terms & Conditions Apply)

Offsite Solutions is ISO 9001 and 14001 registered and certified.

Every OSS pod has a **unique** Identification code for traceability and is accompanied by a full set of quality and certification documents.

Offsite Solutions is part of a family owned group of companies including Deanestor plc. and Dentalstyle Ltd which have been manufacturing products and supplying the construction industry for more than **60 years**. The group employs over 300 people and operates facilities in excess of 200,000 sq. ft.
